FY2003 expenditures of MCH Block Grant funds and state funds were used as planned for in the budget. However, in the "other federal funds", we spent significantly less in two areas. Department plans for how our SSDI money was to be used changed dramatically and this the subsequent awards reduced. The TANF funds were to be distributed to local Health Departments for nurse salaries. Vacancies due to the national nurse shortage are the reason for not spending the full amount budgeted.

### FIELD LEVEL NOTES

1. **Section Number:** Main

**Field Name:** hnumber\_2

**Row Name:** State MCH toll-free hotline telephone number

**Column Name:** FY

**Year:** 2006

**Field Note:**

Although Help Me Grow - Safe Kids hotline continues operating and has steadily shown increases in numbers of Wyoming residents accessing this line, MCH has the opportunity to begin the work of expanding this service.

The Governor's Children and Families Initiative, a state-wide collaborative of many state and not-for-profit agencies focused on improving the health and well-being of Wyoming residents, has begun investigation of supporting a "Family 2-1-1 Line" similar in nature and cope to the United Way 2-1-1 lines in many other states.

This opportunity would provide an excellent opportunity for service providers, agencies and programs within state government as well as locally owned businesses to collaborate in a concentrated effort to expand and offer a comprehensive, state wide information line to families within the state as well as those from other states who are interested in accessing information about services, facilities and/or providers in many of Wyoming's communities.

Initial discussion has begun, however, additional work will be required to access partners, funding and other resources needed to expand this service.

2. **Section Number:** Performance Measure #1  
**Field Name:** PM01  
**Row Name:**  
**Column Name:**  
**Year:** 2003  
**Field Note:**  
The total number of occurent births is 6109 which is different than occurent births reported by vital records. Data on this form are from hospital surveys which should be considered estimates. In 2002, PM7 changed from % of complete 4:3:1:3:3:1 at age two to % of complete 4:3:1:3:3:1 between the ages of 19 and 35 months. The 2002 percentage was taken from the FY 2002 National Immunization Survey. The children in the NIS survey were born between August 1998 and November 2000. A denominator was estimated by determining the average number of births per month by year and then multiplying the monthly average by the number of months included in each survey. (1998 Births/12 \* 5 + 1999 Births + 2000 Births/12 \* 11). The numerator was then estimated from 74.6% of the the denominator.

 A baseline survey was conducted in 2000 and showed that 71.3% of WY 3rd graders had protective sealants. The dental program has not had the staffing to conduct another survey since then. However, the following data are available for FY '04:  
 -The program provided 9,674 sealants for 1,789 children (155 were 3rd graders).  
 -Medicaid Dental provided sealants for 3,082 children (509 were 3rd graders).  
 -The program provided dental screening for 2,690 children not covered by Medicaid or SCHIP.  
 -100 clients accessed dental care through the marginal dental program. This number has decreased as a result of SCHIP taking on more children. This program now sees the more severe cases that have reached their cap with SCHIP.  
 -Over 1,900 youth in 11 school districts took part in the weekly fluoride mouthrinse program, administered by school nurses and volunteers.  
 -76 youth were seen by two "Severe Crippling Malocclusion" clinics.  
 -110 children received orthodontic services funded by MCH and 600 were served with Medicaid funds.  
 -Over 4,400 youth were reached by 48 separate dental education programs.

**Year:** 2002

**Field Note:**

This data is obtained from the YRBS which is done every odd year. There is no new data for 2002. The YRBS uses a complex sampling scheme so exact numerators are not known; however, they were estimated using the most current enrollment in grades 9 - 12 as the denominator. This measure has been changed so that the denominator would match the YRBS which provides information by grade, not by age. 1999's numerator and denominator have been adjusted to reflect this change.

Estimates are based on the previous year.

Wyoming's African American/Black population is very small. As a result, even with three years combined, the number of Black infant deaths does not reach 20. Both White and Black IMRs were standardized to US 1998-2000 rates (White = 5.8 and Black =13.8). Standardized ratios were collapsed into three year averages because there were no black infant deaths in 2001 or 2002. Those 3-year ratios were then used to create the black/white infant mortality ratio. The exception to this is 1998, where only a 2-year average was used as 1996 data were not available.

SP # 6

**PERFORMANCE MEASURE:**

Percent of deaths in children ages 1-24 due to non-motor vehicle related unintentional injuries.

**STATUS:**

Active

**GOAL**

Reduce the number of preventable child deaths.

**DEFINITION**

Deaths, other than car crashes (poisoning, falls, fire, drowning, suffocation, firearms, electrocution, equestrian, and head injuries) that could have been reasonably prevented with appropriate interventions.

**Numerator:**

Number of children 0-24 years of age dying in a calendar year from non-motor vehicle unintentional injuries.

**Denominator:**

Total number of deaths in children and youth ages 1-24 in the same calendar year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wyoming Department of Health's Office of Vital Records is the source of data on child deaths.

**SIGNIFICANCE**

Unintentional deaths due to nonviolent injuries are the 5th leading cause of death in the US. They are the major cause of disabilities and hospitalization and have a significant impact on health care costs. While the number of children in Wyoming who die is relatively small, it is directly related to the much larger number of children who are harmed by the same cause.

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

The Wyoming Youth Risk Behavior Survey. NOTE: This survey is conducted of high school seniors every other year in Wyoming

**SIGNIFICANCE**

weight and eating disorders are increasing among adolescents. Promoting positive eating and physical activity patterns are considered preventive for both overweight and eating disorders. The lack of a positive body image can also assist in other types of nutritional disorders. Healthy behaviors during childhood reduce the potential for chronic conditions in later life, such as diabetes, heart disease, cancer, obesity, and osteoporosis. The Wyoming 1999 YRBS Survey indicates approximately 17.4% of students ages 15-18 years old report being overweight at 5.5% and 11.9% are at risk for being overweight. 4% (6% of females and 2% of male) students reported vomiting or taking laxatives one or more times to lose weight or keep from gaining weight. Body image issues will be addressed in the maternal and child health population.

Wyoming has applied for funding from the CDC for the last two funding cycles. Unfortunately, we have been approved, but not funded both times. If we are successful in receiving PRAMS funding during the next round, we will use SSDI funding (currently for a PRAMS-like project) for birth defect surveillance. It is a priority for WY.

**GOAL**

Reduce the number of preventable child deaths.

**DEFINITION**

**Numerator:**

Number of children 0-24 years of age dying in a calendar year from non-motor vehicle unintentional injuries.

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wyoming Department of Health's Office of Vital Records is the source of data on child deaths.

**SIGNIFICANCE**

Unintentional deaths due to nonviolent injuries are the 5th leading cause of death in the US. They are the major cause of disabilities and hospitalization and have a significant impact on health care costs. While the number of children in Wyoming who die is relatively small, it is directly related to the much larger number of children who are harmed by the same cause.

**DATA SOURCES AND DATA ISSUES**

Wyoming Youth Risk Behavior Survey. NOTE: This survey is conducted only every other year in Wyoming.

**SIGNIFICANCE**

Tobacco use is considered the chief "preventable" cause of death in the U.S. Smoking has been related to poor academic performance and the initiation of alcohol and other substance use (Johnson, O'Malley & Bachman, 1987).

**OBJECTIVE**

2006	2007	2008	2009	2010

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

The Wyoming Youth Risk Behavior Survey. NOTE: This survey is conducted of high school seniors every other year in Wyoming

**SIGNIFICANCE**

weight and eating disorders are increasing among adolescents. Promoting positive eating and physical activity patterns are considered preventive for both overweight and eating disorders. The lack of a positive body image can also assist in other types of nutritional disorders. Healthy behaviors during childhood reduce the potential for chronic conditions in later life, such as diabetes, heart disease, cancer, obesity, and osteoporosis. The Wyoming 1999 YRBS Survey indicates approximately 17.4% of students ages 15-18 years old report being overweight at 5.5% and 11.9% are at risk for being overweight. 4% (6% of females and 2% of male) students reported vomiting or taking laxatives one or more times to lose weight or keep from gaining weight. Body image issues will be addressed in the maternal and child health population.

DATA SOURCES AND DATA ISSUES

SIGNIFICANCE

The Wyoming Youth Risk Behavior Survey. NOTE: This survey is conducted of high school seniors every other year in Wyoming..

The tounger the person starts experimenting with use of illicit drugs, the more habitual and stronger the addiction becomes and the more difficult it is to stop drug use. 13% of high school respondents to the 1999 YRBS reported they had used methamphetamine at least one.
